9 Seattle St
Allston, MA 02134

OBJECTIVE

My long-term career goal is to become a key player in shaping the integration of precision medicine into public health. Currently, my ideal job is one in which I help shape the vision of a company which uses computational biology to impact society.

EDUCATION

Massachusetts Institute of Technology, *Cambridge, MA* 2014 – 2019
Ph.D., Biological Engineering

Columbia University, *New York, NY* 2009 – 2013
B.S., Biomedical Engineering

RESEARCH

Massachusetts Institute of Technology 2015 – present
Supervisor: Eric J. Alm, Ph.D.
Department of Biological Engineering

I study the relationship between the microbiome and health and disease, and am generally interested in personalized medicine approaches for public health applications.

Columbia University 2011 – 2013
Supervisor: Samuel L. Sia, Ph.D.
Molecular and Microscale Bioengineering Laboratory

As an undergraduate research assistant, I worked on developing a point-of-care microfluidic device to diagnose multi-drug resistant tuberculosis.

Software

Percentile normalization
Correcting batch effects in case-control microbiome studies.

Python implementation: github.com/seangibbons/percentile_normalization *(contributor)*
QIIME 2 plugin: github.com/cduvallet/q2-perc-norm *(developer)*

Distribution-based OTU calling
New implementation of Preheim *et al.*'s distribution-based OTU clustering algorithm.

Python implementation: github.com/swo/dbotu3 *(contributor)*
QIIME 2 plugin: github.com/cduvallet/q2-dbotu *(developer)*

Amplicon sequencing pipeline
End-to-end pipeline to process 16S data.

Python: github.com/thomasgurry/amplicon_sequencing_pipeline *(co-developer)*

Fellowships & Awards

Fellowships

Siebel Scholars Foundation — 2018
Siebel Scholar Class of 2019

National Defense Science and Engineering Graduate Fellowship — 2015 – 2018
NDSEG Recipient

National Science Foundation Graduate Research Fellowship — 2015
Honorable Mention

Henry Luce Foundation — 2013 – 2014
Luce Scholar

Awards

PSB Award for Rigorous Secondary Data Analysis 2019
Junior Research Parasite

MIT Graduate Women of Excellence 2017

Salutatorian 2013
Columbia University Fu Foundation School of Engineering and Applied Science

King's Crown Bronze Leadership Award 2012
Columbia University

Teaching Experience

Teaching Assistant Fall 2015
20.106 Systems Microbiology, *Massachusetts Institute of Technology*

I was a TA for seven advanced undergraduate students in a new course on the human microbiome, emerging disease, phylogenetics, and host-microbe interactions.

Lecturer 2013 – 2014
Biomedical Equipment Technology Department, *University of Puthisastra*
Engineering World Health, *Phnom Penh, Cambodia*

As a Luce Scholar, I was one of the first lecturers for Engineering World Health's new Associate Bachelors program in Biomedical Equipment Technology at the University of Puthisastra, a private university in Phnom Penh.

Leadership & Service

Academic and professional

MIT Biotech Group 2017 – 2018
Beyond the Bench Initiative board member

MIT Microbiome Club 2015 – 2018
Co-Founder, President, Executive board member
MIT-Harvard Microbiome Symposium, co-founder and organizing committee

Departmental and MIT

Graduate Student Advisory Group for Engineering (GradSAGE) 2017 – present
Advisory group to the Dean of the School of Engineering

MIT Graduate Student Council 2017 – present
Diversity and Inclusion Subcommittee
Vice Chair, Department and Classroom Inclusion co-coordinator

BE Resources for Easing Friction and Stress (BE REFS) 2016 – present
Confidential conflict management coach and graduate student advocate

BE Graduate Student Board 2015 – 2018
Diversity Chair

Co-Founder, BE Application Assistance Program
Lead author, BE Departmental Values Statement
Co-Lead, 2016 BE Diversity Survey

Outreach & Mentorship

Science Club for Girls, Young Leaders in STEM 2016 and 2017
Volunteer, developed and taught three-day course on microbiology and the human microbiome

ESL Program for MIT Service Employees 2015 – 2018
Math GED tutor
