

Claire Duvallet

CONTACT	duvallet@mit.edu cduvallet.github.io	9 Seattle St Allston, MA 02134
OBJECTIVE	My long-term career goal is to become a key player in shaping the integration of precision medicine into public health. Currently, my ideal job is one in which I help shape the vision of a company which uses computational biology to impact society.	
EDUCATION	Massachusetts Institute of Technology , <i>Cambridge, MA</i> Ph.D., Biological Engineering	2014 – 2019
	Columbia University , <i>New York, NY</i> B.S., Biomedical Engineering	2009 – 2013
RESEARCH	Massachusetts Institute of Technology Supervisor: Eric J. Alm, Ph.D. <i>Department of Biological Engineering</i> I study the relationship between the microbiome and health and disease, and am generally interested in personalized medicine approaches for public health applications.	2015 – present
	Columbia University Supervisor: Samuel L. Sia, Ph.D. <i>Molecular and Microscale Bioengineering Laboratory</i> As an undergraduate research assistant, I worked on developing a point-of-care microfluidic device to diagnose multi-drug resistant tuberculosis.	2011 – 2013
PUBLICATIONS	<ol style="list-style-type: none">Chengzhen Dai, Claire Duvallet, An Ni Zhang, Mariana Matus, Newsha Ghaeli, Shinkyu Park, Noriko Endo, Siavash Isazadeh, Kazi Jamil, Carlo Ratti, and Eric Alm. “Multi-site sampling and risk prioritization reveals the public health relevance of antibiotic resistance genes found in sewage environments.” <i>in preparation</i>Claire Duvallet, Caroline Zellmer, Pratik Panchal, Shrish Budree, Madji Osman, and Eric Alm. “Framework for rational donor selection in fecal microbiota transplant clinical trials.” <i>in preparation.</i>Mariana Matus, Claire Duvallet, Newsha Ghaeli, Melissa Kido Soule, Krista Longnecker, Ilana Brito, Carlo Ratti, Elizabeth B. Kujawinski, Eric Alm. “Untargeted detection of human health and activity markers in residential wastewater through microbiome sequencing and metabolomics.” <i>in preparation.</i>Claire Duvallet, Kara Larson, Scott Snapper, Sonia Iosim, Ann Lee, Katherine Freer, Kara May, Eric Alm, and Rachel Rosen. “Aerodigestive sampling reveals altered microbial exchange between lung, oropharyngeal, and gastric microbiomes in children with impaired swallow function.” <i>PLoS ONE</i>, <i>in review</i> (preprint).Keegan Korthauer*, Patrick Kimes*, Claire Duvallet[†], Alejandro Reyes[†], Ayshwarya Subramanian[†], Mingxiang Teng, Chinmay Shukla, Eric Alm, Stephanie Hicks. “A practical guide to methods controlling false discoveries in computational biology.” <i>Genome Biology</i>, <i>in review</i> (preprint).

SOFTWARE

Percentile normalization

Correcting batch effects in case-control microbiome studies.

Python implementation: github.com/seangibbons/percentile_normalization (*contributor*)
 QIIME 2 plugin: github.com/cduvallet/q2-perc-norm (*developer*)

Distribution-based OTU calling

New implementation of Preheim *et al.*’s distribution-based OTU clustering algorithm.

Python implementation: github.com/swo/dbotu3 (*contributor*)
 QIIME 2 plugin: github.com/cduvallet/q2-dbotu (*developer*)

Amplicon sequencing pipeline

End-to-end pipeline to process 16S data.

Python: github.com/thomasgurry/amplicon_sequencing_pipeline (*co-developer*)

FELLOWSHIPS & AWARDS

Fellowships

Siebel Scholars Foundation <i>Siebel Scholar Class of 2019</i>	2018
National Defense Science and Engineering Graduate Fellowship <i>NDSEG Recipient</i>	2015 – 2018
National Science Foundation Graduate Research Fellowship <i>Honorable Mention</i>	2015

Henry Luce Foundation <i>Luce Scholar</i>	2013 – 2014
--	-------------

Awards

PSB Award for Rigorous Secondary Data Analysis <i>Junior Research Parasite</i>	2019
MIT Graduate Women of Excellence	2017
Salutatorian <i>Columbia University Fu Foundation School of Engineering and Applied Science</i>	2013
King's Crown Bronze Leadership Award <i>Columbia University</i>	2012

TEACHING EXPERIENCE	Teaching Assistant 20.106 Systems Microbiology, <i>Massachusetts Institute of Technology</i>	Fall 2015
------------------------	--	-----------

I was a TA for seven advanced undergraduate students in a new course on the human microbiome, emerging disease, phylogenetics, and host-microbe interactions.

Lecturer Biomedical Equipment Technology Department, <i>University of Puthisastra</i> Engineering World Health, <i>Phnom Penh, Cambodia</i>	2013 – 2014
--	-------------

As a Luce Scholar, I was one of the first lecturers for Engineering World Health's new Associate Bachelors program in Biomedical Equipment Technology at the University of Puthisastra, a private university in Phnom Penh.

LEADERSHIP & SERVICE	Academic and professional	
	MIT Biotech Group <i>Beyond the Bench Initiative board member</i>	2017 – 2018
	MIT Microbiome Club <i>Co-Founder, President, Executive board member</i> <i>MIT-Harvard Microbiome Symposium, co-founder and organizing committee</i>	2015 – 2018

Departmental and MIT

Graduate Student Advisory Group for Engineering (GradSAGE) Advisory group to the Dean of the School of Engineering	2017 – present
MIT Graduate Student Council Diversity and Inclusion Subcommittee <i>Vice Chair, Department and Classroom Inclusion co-coordinator</i>	2017 – present
BE Resources for Easing Friction and Stress (BE REFS) <i>Confidential conflict management coach and graduate student advocate</i>	2016 – present
BE Graduate Student Board <i>Diversity Chair; co-Founder, BE Application Assistance Program</i>	2015 – 2018

Outreach & Mentorship

Science Club for Girls, Young Leaders in STEM <i>Volunteer, developed and taught three-day course on microbiology and the human microbiome</i>	2016 and 2017
---	---------------
